Mobile security, employee privacy

A ground-breaking MTD that manages the risk of your mobiles without invading users' privacy.

WHY TRACED MOBILE THREAT DEFENSE?

- ✓ Mobile threats are real & dangerous**

Mobile cyberattacks increased 1,400% between 2016 and 2020. Traced Mobile Threat Defence protects iOS and Android devices from mobile-borne threats.
- ✓ Traced detects threats others can't**

Traced has unique AI-powered protection against malware, phishing and data theft that outperforms other vendors' out-dated detection methods.
- ✓ Traced enables Zero Trust**

Traced can restrict access to your company's data from untrusted devices, whether they're managed by MDM/MAM or unmanaged.
- ✓ Traced respects employee privacy**

Your business remains protected against mobile threats without tracking employees, keeping their private lives just that - private.
- ✓ Traced keeps you compliant**

Traced reduces the risk of data breaches and associated legal, reputational and financial costs, supporting GDPR compliance.
- ✓ Traced is committed to doing more**

Traced is competitively priced and quick to on-board, thanks to its efficient architecture, and is continuously innovating to bring new features to customers.

WHAT THREATS DOES TRACED STOP?
